Summary

A tech enthusiast for as long as I can remember, I found a new passion for IT when I got my first PC at 12. Since then, I have dived deeper and deeper into how to set up and fix computers and build new Software, bringing solutions to more than a thousand customers between SMEs, big companies, and domestic users throughout my career.

Always eager to learn, I am looking to be part of a team where we can work together to create solutions for the end user and where I can bring my coding and management skills.

Skills

- Leadership
- Communication Skills
- Accountability
- Teamwork
- JavaScript
- HTML
- CSS
- Firebase
- PHP
- Jira
- Git
- .NET
- Kendo UI
- Vue.js

Work Experience

RestPoint Argentina | CABA, Argentina
Founder- IT Support | 09/2009 - Present

- I founded this IT support business that increased the productivity of SMEs in the region of Buenos Aires, by bringing solutions on demand to more than three hundred customers.
- Generated operations documentation helping new collaborators in the onboarding process.
- Created video and text tutorials for end users and customers.
- Built ethernet and Wi-Fi networks from scratch in companies, social centers, and SMEs, making sharing files, devices, and printers across their offices much easier.
- Developed “SGR” a system built with PHP to manage customers’ devices, their repairs, and warranties in a simple dashboard. Currently, I am working on a new, more scalable version to release to the public as a solution for other repair shops.

Bonzzu | Florida, USA (Remote)
Software Engineer (Contractor) | 03/2022 - 04/2023

Selected Project

Intelliflo Office

Using .NET, Kendo UI, applying the CQRS pattern, and organizing tasks and docs with Azure DevOps and Jira, I participated in the development of "Intelliflo Office", a tool used by big financial institutions to manage investors’ wealth. Intelliflo is a company that provides solutions supporting over 30,000 financial professionals worldwide, representing over three million end investors, with over \$1 trillion (US) advised across their platforms.

- I participated in developing user views and modals such as: Trading Exceptions, Trading orders, and Advisor dashboard, among others.

- Developed widgets with jQuery and Kendo UI, such as: tables with filter and grouping features, masked inputs, redacted date-pickers, customizing the ones that Kendo UI offers and expanding them, making the workflow much easier and more secure for the final user.
- I made videos and documentation teaching new hires how to set up their laptops and how to use the product we were working on, so their onboarding was as smooth and quick as possible.

MindHub LA | CABA, Argentina
Mentor / Team Lead, 12/2019 – 03/2022

- I trained and accompanied students in boot camps and courses in different technologies (HTML, CSS, and JS, Vue, Node, Firebase, Angular) both for individuals (B2C) and internal training of companies (B2B), helping with the financial and professional growth to 1000+ students along the process.
- Generated teaching material such as Moodle content, practice projects for students, and live examples for classes,
- I led the mentoring team by organizing teaching topics and schedules, proposing new evaluation criteria, helping in the onboarding process of new hires, and being the mediator between C-suite executives and junior-level employees.

Social programs

Hackathon “LHET: Lo hackeamos entre todos” | 04/2020 | CABA, Argentina

- I led a team of developers and designers to build S.A.U.H.C.E., a system where medical staff could keep track of the clinic history of COVID-19-infected patients.
- This project caught the attention of political leaders in two Buenos Aires Province cities. We got to the point of having a beta version running, but soon after, the national government released an official app doing the same thing we did, so we shut down the project.
- The original landing page is still available at <https://brankohbk.github.io/sauhceweb/>

Education

Higher Technical Training Institute 29 (IFTTS29) | CABA, Argentina

Senior Technician in Software Development | 03/2024 - Present

- Grade: first semester

District 2 Technical School No.28 “República Francesa” | CABA, Argentina

Technician in Electronics | 03/2001 – 12/2006

- Grade: Technician
- Extracurricular languages: German (A2), Italian (A2)

Certifications & Achievements

- Full Stack Web Developer | 2019 | Ministry of Education and Innovation of the Autonomous City of Buenos Aires
